S3104-2

COMMUTING IN KENTUCKY

Kentucky Department of Economic Development

1984

This edition of Commuting in Kentucky has been prepared by the Kentucky Department of Economic Development, Division of Research and Planning, and the cost of printing paid from state funds. Editor: Edith Rogers; Clerical: Bobbi Medley; Graphics, Tony Cecconi, Robert Owens.

PREFACE

Information contained in this booklet, Commuting in Kentucky, is based on the 1980 U.S. Census of Population. This booklet is divided into three sections.

Section I shows the number of people commuting in and out of each Kentucky county, the number of people working and residing in each Kentucky county, and the total number of workers living in each Kentucky county.

Section II shows the number of Kentucky residents commuting into other states, and the number of out-of-state residents commuting into Kentucky.

Section III shows the percent of workers working inside county of residence, percent of workers working outside county of residence, and the percent of place of work not reported. This section also contains information on the means of transportation used by workers 16 years and over.

The appendix following Section III contains a description of the general methodology used in preparing the data used in this booklet, along with definitions of terms; and a map of Kentucky counties and interstate commuting areas.

APPENDIX

METHODOLOGY

The commuting data presented in this booklet were prepared from unpublished tabulations provided by the U.S. Bureau of The Census, Journey-To-Work and Migration Statistics Branch. The data on means of transportation to work were taken from published sources, as indicated.

The numbers of commuters were tabulated by the Bureau of the Census from questionnaires gathered from individual households during the 1980 Census of Population in April, 1980. Final tabulations of commuters were based on a sample covering about one in five households in Kentucky and the states receiving or providing commuters.

Detailed information on the sampling methods, questions asked of respondents, processing of data, and standard errors for commuting data may be found in the following U.S. Bureau of the Census publications.

1. 1980 Census of Population and Housing, User's Guide, PHC80-R1, 1982

2. 1980 Census of Population, General Social and Economic Characteristics, Kentucky, PC 80-1-19, July, 1983

Place of Work

The places of work of individuals were assigned to counties by the U.S. Bureau of the Census, based on the addresses listed by respondents to census questionnaires. The addresses reflected the workers' perceptions of the names of the communities where they worked. Some workers specified census designated places, composed of closely settled population centers without legal boundaries, but readily identified by area residents and commuters.

In some instances the county of work could not be determined and the community name was used in the tabulations. This occured where a community or census designated place crossed county lines and lay in two or more counties:

Illinois

Chicago (City) - Cook and DuPage Counties
Elk Grove Village (Village) - Cook and Dupage Counties

Indiana

Batesville (City) - Franklin and Ripley Counties
Edinburg (Town) - Bartholomew and Johnson Counties

Kentucky

Corbin (City) - Knox and Whitley Counties
Ft. Knox (Census Designated Place) - Hardin and Meade Counties

Missouri

Joplin (City) - Jasper and Newton Counties
Kansas City (City) - Clay, Jackson, and Platte Counties
Sikeston (City) - New Madrid and Scott Counties

Ohio

Carlisle (Village) - Montgomery and Warren Counties
Columbus (City) - Fairfield and Franklin Counties
Dayton (City) - Greene and Montgomery Counties
Pickerington (Village) - Fairfield and Franklin Counties
Plain City (Village) - Madison and Union Counties
Reynoldsburg (City) - Fairfield, Franklin, and Licking Counties

West Virginia

Culloden (Census Designated Place) - Cabell and Putman Counties
Huntington (City) - Cabell and Wayne Counties
Nitro (City) - Kanawha and Putman Counties
Weirton (City) - Brooke and Hancock Counties
Wheeling (City) - Marshall and Ohio Counties

The listings for Virginia include several independent cities that are completely separate from county territorial jurisdiction:

Bristol
Fairfax
Hampton
Harrisonburg
Newport News
Norfolk
Norton
Richmond
Roanoke
Virginia Beach

It will be noted that the commuting data show individuals working at points in adjoining states far distant from their county of residence. Some of these figures indicate workers on temporary work assignments in those areas during the census enumeration week and those individuals returning to their homes infrequently, such as on weekends. Examples include persons performing inspections and audits, and construction workers.

Means of Transportation

The means of transportation to work indicates the principal mode of travel or type of conveyance used by workers to get from their homes to their work place during the census reporting week.

The term "Drove Alone" includes persons who usually drove alone to work, as well as those who were driven to work by someone else who then drove to a nonwork location.

"Carpool" includes workers who shared driving, drove others, or rode as a passenger.

"Public Transportation" included buses or streetcars, trains, and taxicabs.

The category "Other Means" included travel by miscellaneous conveyances such as bicycles, motorbikes, mopeds, motorboats, ferries, aircraft, etc.
